# **Portfolio Allocation in Western Europe**

(Coalition variables v001x-v280x)

Version of March 7, 2012

The data originally collected for, *Coalition Governments in Western Europe* (2000) edited by Wolfgang C. Müller and Kaare Strøm, Oxford: Oxford University Press, included the distribution of ministry positions (portfolios) among the cabinet parties. Data for Greece Iceland, Spain, and the United Kingdom were later collected by the CCPD-project with the help of Paraskevi Zagoriti, Indridi H. Indridason, Josep M. Reniu and Thomas Saalfeld, respectively.

The same data set included also variables 269x-280x, which are from the country tables (Table 1) in the country chapters *Delegation and Accountability in Parliamentary Democracies* (2003, paperback 2006), edited by Kaare Strøm, Wolfgang C. Müller, and Torbjörn Bergman, Oxford: Oxford University Press.

Further details are available on the project home page <u>www.erdda.se</u>.

However, the ministry data has previously not been publically available on this home page. This is because we decided to withhold them until such time one or more of our contributors would fine time to clean and double-check the data. Only recently has ministry portfolio data (v115x-v279x) for 12 countries and 13 portfolios have been cross-checked and cleaned. One of our contributors, Patrick Dumont, has used these data for the following article. Bäck, Debus & Dumont (2011) "Who gets what in coalition governments? Predictors of portfolio allocation in parliamentary democracies", *European Journal of Political Research*, 50, p 441-78.

Thus, we can now present for the first time the full set of variables for 13 countries. These are Austria, Belgium, Denmark, Finland, Germany, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, and Sweden.

Publications using this data should acknowledge in writing that the information comes from the *Parliamentary Democracy Data Archive* and the Bäck, Debus & Dumont (2011) article mentioned above.

Non applicable (N.A.) is coded as 88888. Missing data is coded as blank or 99999. Ministry codes for the relevant countries are found in the appendix that follows this codebook.

To use the information coded by political party, you will need the *Party code book*, also published in the data archive.

		Voting result, final vote of investiture:	
v273x Voting result, final vote of investiture: other	V070v		

v274x	No of no confidence votes	
v275x	Cabinet removed by no confidence vote	0=No, 1=Yes
v276x	Cabinet resigned to preempt no confidence vote	0=No, 1=Yes
v277x	No of confidence votes under specific institutional mechanism	
v278x	Cabinet removed by failed confidence vote	0=No, 1=Yes (v278x = 1 IF v219x = 1 OR v221x = 1 OR v223x = 1. If any of these events are followed by an immediate election [instead of a new cabinet] AND IF the resignation occurs before 10% or less remains of the maximum length [in days] of the constitutionally mandated period for that particular cabinet.) This means that there should be a "1" only if there is an "E" or an "FE" in v019x and v0008x amounts to less than 90% of v0007x.
v279x	Did the cabinet end with an early election?	0=No, 1=Yes *v279x imposes a cross-national definition of an early election. The cross-national definition shows up in Table 1 in the country chapters in the D&A book and Table 4.13 in D&A book. For definition, see page 166-167 in D&A book. ** In cases where an early election was called for overriding constitutional reasons (technical resignations), v279x = 0 (i.e. Denmark 1953, Spain 1979, etc.)
v280x	Who dissolved parliament? (decisive actor)	1=H o S, 2=PM, 3=Cabinet, 4=Parliamentary majority, 5=Automatic constitutional provision (This identifies the main constitutional actor that caused the early election. We have not coded the formal signatory, but rather the person or body that made the final decision.)
